

Product Data Sheet

Product Name: Enerisant

Cat. No.: GC74093

Chemical Properties

Cas. No. 1152747-82-4

Formula $C_{22}H_{30}N_4O_3$ M.Wt 398.5

Solubility DMSO : 100 mg/mL (250.94 mM; Storage -20°C
Need ultrasonic)

General tips For obtaining a higher solubility , please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT , or blue ice upon request.

Structure

Background

Enerisant is a potent, highly selective, competitive and orally active histamine H3 receptor

Caution: Product has not been fully validated for medical applications. For research use only.

Tel: (909) 407-4943 Fax: (626) 353-8530 E-mail: tech@glpbio.com

Address: 10292 Central Ave. #205, Montclair, CA, USA

Product Data Sheet

antagonist/inverse agonist with IC50s of 2.89 nM and 14.5 nM against human and rat histamine H3 receptors, respectively.

Enerisant drochloride (0.3-1 mg/kg; p.o.; once) attenuates the dipsogenia response in rats[1]. Enerisant drochloride (0.1-3 mg/kg; p.o.; once) results in the occupancy of the histamine H3 receptor in a dose-dependent manner in rats. A dose eliciting a half-maximal receptor occupancy is 0.78 mg/kg[1]. Enerisant drochloride (1 mg/kg; s.c.; once) increases the total extracellular histamine levels in the posterior pothalamus in rats[1]. Enerisant drochloride (1 mg/kg; i.p.; once) increases the total extracellular dopamine and acetylcholine levels in the medial prefrontal cortex (mPFC) in rats[1].
