

Product Data Sheet

Product Name: Ac2-26 ammonium

Cat. No.: GC74339

Chemical Properties

Cas. No.

Formula $C_{141}H_{210}N_{32}O_{44}S.xNH_3$ M.Wt 3089.43 (free base)

Solubility H_2O : 50 mg/mL (ultrasonic and adjust pH to 8 with $NH_3.H_2O$) Storage Sealed storage, away from moisture and light, under nitrogen

General tips For obtaining a higher solubility , please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT , or blue ice upon request.

Structure

Ac-AMVSEFLKQAWFIENEEQEYVQTVK (ammonium)

Background

Ac2-26 ammonium is the N-terminal peptide of annexin 1, and has anti-inflammatory activity. Ac2-26 ammonium induces a decrease in IKK β protein in lysosomes by chaperone-mediated autophagy (CMA). Ac2-26 ammonium ameliorates lung ischemia-reperfusion injury. Ac2-26 ammonium also inhibits airway inflammation and perresponsiveness in an asthma rat model.
