

Product Data Sheet

Product Name: Azoramide

Cat. No.: GC19054

Chemical Properties

Cas. No. 932986-18-0

SMILES CCCC(NCCC1=CSC(C2=CC=C(Cl)C=C2)=N1)=O

Formula $C_{15}H_{17}ClN_2OS$ M.Wt 308.83

Solubility DMSO : ≥ 30 mg/mL (97.14 mM) Storage Store at $-20^{\circ}C$

General tips For obtaining a higher solubility, please warm the tube at $37^{\circ}C$ and shake it in the ultrasonic bath for a while. Stock solution can be stored below $-20^{\circ}C$ for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

Azoramide is a small-molecule modulator of the unfolded protein response with antidiabetic activity. *in vitro*: Azoramide is a dual-function endoplasmic reticulum (ER) modulator. Azoramide improves ER protein-folding ability and activates ER chaperone capacity to protect cells against ER stress in multiple systems. Azoramide regulates ER folding and secretion capacity without inducing ER stress. Azoramide might have the protective effects of enhancing chaperone expression and reducing protein synthesis without inducing cytotoxicity and apoptosis. *in vivo*: Azoramide exhibits potent antidiabetic efficacy in two independent mouse models of obesity by improving insulin sensitivity and

Caution: Product has not been fully validated for medical applications. For research use only.
