

Product Data Sheet

Product Name: Aripiprazole

Cat. No.: GC10117

Chemical Properties

Cas. No. 129722-12-9

Chemical Name 7-[4-[4-(2,3-dichlorophenyl)piperazin-1-yl]butoxy]-3,4-dihydro-1H-quinolin-2-one

SMILES C1CC(=O)NC2=C1C=CC(=C2)OCCCCN3CCN(CC3)C4=C(C(=CC=C4)Cl)Cl

Formula C₂₃H₂₇Cl₂N₃O₂

M.Wt 448.39

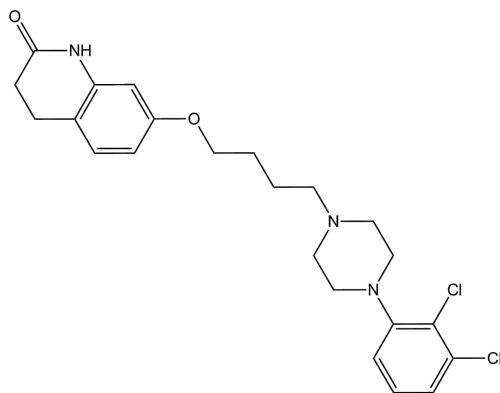

Solubility ≥ 22.4mg/mL in DMSO

Storage Store at 2-8°C, protect from light

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

Aripiprazole is a novel and atypical antipsychotic [1].

Aripiprazole has been found to be a dopamine-serotonin system stabilizer with potent partial agonist activity at dopamine D₂ and 5-HT_{1A} receptors and antagonist activity at 5-HT_{2A} receptors. In addition, aripiprazole has been reported to label with the agonist [¹²⁵I]7-OH-PIPAT and with the antagonist [³H]spiperone with 0.34±0.02nM and 0.70±0.22nM, respectively. Besides, aripiprazole has been revealed to dose-dependently and potently inhibit the increase in cAMP accumulation

Caution: Product has not been fully validated for medical applications. For research use only.

Address: 10292 Central Ave. #205, Montclair, CA, USA

Product Data Sheet

stimulated by forskolin in CHO cells and HEK-293 cells. Other results have also been reported that aripiprazole completely inhibited the increase GTPase activity stimulated by the D2 receptor agonist quinpirole in rat striatal membranes [1].
