

Product Data Sheet

Product Name: Azide-Polysarcosine20

Cat. No.: GC91880

Chemical Properties

Cas. No.

Chemical Name N-(3-azidopropyl)-2-(methyl((methylamino)methyl)amino)acetamide

SMILES O=C(CN(C)CNC)NCCCN=[N+]=[N-]

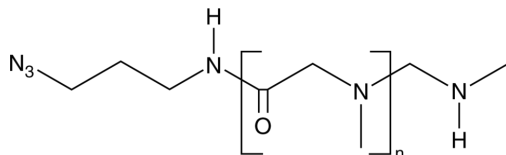

Formula $(C_3H_5NO)_n C_5H_{13}N_5$ M.Wt

Solubility Chloroform: soluble Storage $-20^{\circ}C$

General tips For obtaining a higher solubility, please warm the tube at $37^{\circ}C$ and shake it in the ultrasonic bath for a while. Stock solution can be stored below $-20^{\circ}C$ for several months.

Shipping Condition Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request.

Structure

Background

Azide-polysarcosine20 is a azide-containing form of the amine-functionalized hydrophilic polymer polysarcosine20.¹ Azide-polysarcosines have been used in the formation of hydrophobicity-masking antibody-drug conjugates for the selective release of monomethyl auristatin E to tumors in rats.
