

Product Data Sheet

Product Name: 5-Br-PADAP

Cat. No.: GD03388

Chemical Properties

Cas. No. 14337-53-2

Formula $C_{15}H_{17}BrN_4O$

M.Wt 349.226

Solubility

Storage 2-8°C

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request.

Structure

Background

5-Br-PADAP is a highly sensitive organic colorimetric reagent, its full name is 2-(5-bromo-2-pyridinylazo)-5-(diethylamino)phenol, which can be used for the colorimetric determination of cadmium (Cd) and nickel (Ni), with a maximum absorption wavelength $\lambda_{max}=443nm$ ^[1, 2]. By using 5-Br-PADAP and measuring the absorbance at 580nm, Cr(III) and Cr(VI) ions in chromium plating electrolysis wastewater can be determined simultaneously^[3].
