

Product Data Sheet

Product Name: UBA6-IN-1 hydrochloride

Cat. No.: GC81860

Chemical Properties

Cas. No. 1557138-61-0

Formula $C_{20}H_{22}ClN_5O_4S$ M.Wt 463.94

Solubility DMSO: 100 mg/mL (215.55 mM; Need ultrasonic) Storage Store at 4°C, sealed storage, away from moisture

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

UBA6-IN-1 hydrochloride is a UBA6/UBE1L2 inhibitor ($IC_{50} \leq 50$ nM) that acts by reducing the level of squalene epoxidase (SQLE). UBA6-IN-1 hydrochloride affects SREBP-dependent lipid metabolism processes and downstream cholesteryl ester transport, and can be used for cancer research [1].

In Vitro, UBA6-IN-1 hydrochloride (I-01) potently inhibits Uba6 enzyme activity, achieving 87% inhibition at $0.123 \mu M$ [1]. UBA6-IN-1 ($10 \mu M$; 6 h) hydrochloride alters SREBP-dependent lipid

Caution: Product has not been fully validated for medical applications. For research use only.
