

Product Data Sheet

Product Name: Methenolone acetate

Cat. No.: GC63066

Chemical Properties

Cas. No. 434-05-9

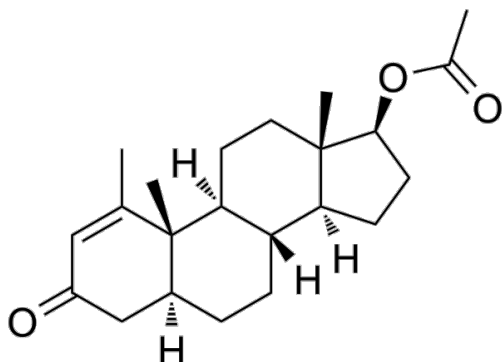

Formula $C_{22}H_{32}O_3$ M.Wt 344.49

Solubility DMSO : ≥ 3.6 mg/mL (10.45 mM) Storage Store at -20°C

General tips For obtaining a higher solubility, please warm the tube at 37°C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

Methenolone acetate is a long-acting anabolic steroid with weak androgenic properties. IC₅₀ value: Target: Methenolone acetate is a naturally occurring compound, found within the adrenal glands of pregnant domesticated felines, and is supplied as the acetate ester for oral administration. Methenolone acetate can be suppressive of the hypothalamic-pituitary-gonadal axis. [1] Methenolone acetate is available as an injection or as an oral formulation. Methenolone is not 17- α -alkylated, but 1-methylated for oral bioavailability. This reduces the stress on the liver, but also the availability. [2]

Caution: Product has not been fully validated for medical applications. For research use only.
