

Product Data Sheet

Product Name: Elarekibep

Cat. No.: GC72469

Chemical Properties

Cas. No. 2485020-60-6

Formula M.Wt

Solubility Storage

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Elarekibep

Background

Elarekibep (PRS-060) (AZD1402) is a high affinity, slowly dissociating, long-acting full antagonist of IL-4Ra. Elarekibep can be used for the research of T2 endotype asthma.

Elarekibep (PRS-060) (0-10 µM) inhibits IL-4- or IL-13-induced STAT-6 phosphorylation with IC₅₀ values of 0.12 nM and 0.10 nM, respectively^[1].

Caution: Product has not been fully validated for medical applications. For research use only.

Address: 10292 Central Ave. #205, Montclair, CA, USA

Product Data Sheet

PRS-060 (0-10 μ M) inhibits hIL-4 or hIL-13 induced proliferation of TF-1 cells with IC₅₀ values of 0.87 nM and 0.92 nM, respectively^[1].

PRS-060 (0-10 μ M) inhibits hIL-13 induced human epithelial cell mucus transdifferentiation with an IC₅₀ value of 0.3 nM^[1].

PRS-060 (i.t; 2, 10, 50 μ g) inhibits IL-13-induced eotaxin-1 expression in the lung and ovalbumin-induced acute allergic inflammation in the humanized mouse^[1].
