

Product Data Sheet

Product Name: CPS-11
Cat. No.: GC72888

Chemical Properties

Cas. No. 145945-21-7

Formula $C_{14}H_{12}N_2O_5$ M.Wt 288.26

Solubility DMSO : 57.7 mg/mL (200.17 mM); Storage 4°C, protect from light
Need ultrasonic and warming)

General tips For obtaining a higher solubility , please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT , or blue ice upon request.

Structure

Background

CPS-11 (N-(dioxymethyl)thalidomide) a Thalidomide analogue, is a potent anti-cancer agent. CPS-11 inhibits NF-κB, activates NFAT, and repress cytokine expression through elevated ROS. CPS-11 exhibits a wider activity spectrum and higher potency against MM (multiple myeloma) cell lines.

CPS-11 abrogates ability of bone marrow stromal cells (BMSCs) to induce proliferation of MM cells, confirming its ability to target tumor cells in the bone marrow microenvironment[1]. CPS-11 (0-200 μM, 0 or 4 h) shows virtually no effect on activation of p38 and only slight, transient activation of ATF2 and

Caution: Product has not been fully validated for medical applications. For research use only.

Address: 10292 Central Ave. #205, Montclair, CA, USA

Product Data Sheet

HSP27[2].CPS-11 (0-100 μ M, 24 or 48 h) was no toxic to H157 cells, WT MEFs or the p38 α ^{-/-} MEFs at doses as high as 100 μ M[2].CPS-11 (50 μ M, 24 or 48 h) does not induce apoptosis in H157 cells[2].
