

Product Data Sheet

Product Name: Ppc-1
 Cat. No.: GC91966

Chemical Properties

Cas. No. 1245818-17-0

Chemical Name 4-methoxy-8-[(3-methyl-2-buten-1-yl)oxy]-2-quinolinecarboxylic acid, 3-methyl-2-buten-1-yl ester

SMILES COC1=C(C=CC=C2OC/C=C(C)\C)C2=NC(C(OC/C=C(C)/C)=O)=C1

Formula $C_{21}H_{25}NO_4$ M.Wt 355.4

Solubility Storage -20°C

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request.

Structure

Background

Ppc-1 is a prenylated quinolinecarboxylic acid originally isolated from *P. pseudo-candidum* that has diverse biological activities.^{1,2,3} It reduces the proliferation of K562 chronic myelogenous leukemia (CML) cells and 3T3-L1 mouse fibroblasts when used at a concentration of 15 μM.¹ Ppc-1 (1 and 10 μM) inhibits the production of IL-2 induced by concanavalin A in Jurkat T cells.² *In vivo*, Ppc-1 (0.8 mg/kg) reduces body weight gain and increases serum fatty acid levels in mice fed a commercial diet.³

Caution: Product has not been fully validated for medical applications. For research use only.
