

Product Data Sheet

Product Name: AGFAGDDAPR

Cat. No.: GC79667

Chemical Properties

Cas. No. 330204-04-1

Formula $C_{41}H_{61}N_{13}O_{15}$

M.Wt 976

Solubility Storage Sealed storage, away from moisture

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

AGFAGDDAPR is a bioactive peptide that is a competitive and orally effective inhibitor of dipeptidyl peptidase-IV (DPP-IV). AGFAGDDAPR can enhance the level of GLP-1 in the body by inhibiting DPP-IV, thereby stimulating insulin secretion, improving β -cell function, and inhibiting abnormal proliferation of α -cells, exerting anti-diabetic effects. AGFAGDDAPR can be used for research on type 2 diabetes [1].
