

## Product Data Sheet

Product Name: Agouti-related Protein (AGRP) (83-132) Amide (human) (TFA)

Cat. No.: GC74361

### Chemical Properties

Cas. No.

Formula  $C_{235}H_{362}N_{76}O_{67}S_{11} \cdot xC_2HF_3O_2$  M.Wt 5790.62 (free acid)

Solubility Storage Sealed storage, away from moisture and light, under nitrogen

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution: ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

SSRRGVRLHESCLGQQVPCCDPCATCYCRFFNAFCYCRKLGAMNPCSRT-NH<sub>2</sub>  
(Disulfide bridge: Cys<sub>1</sub>-Cys<sub>4</sub>; Cys<sub>2</sub>-Cys<sub>6</sub>; Cys<sub>3</sub>-Cys<sub>9</sub>; Cys<sub>5</sub>-Cys<sub>10</sub>; Cys<sub>7</sub>-Cys<sub>8</sub>) (TFA salt)

### Background

Agouti-related Protein (AGRP) (83-132) Amide (human) TFA is a fragment of agouti-related protein (AGRP) which is a protein found in abundance in the arcuate nucleus of the hypothalamus. AgRP primarily acts as an inverse agonist for the melanocortin-4 receptor (MC4R) to increase food intake.

Agouti-related Protein (AGRP) (83-132) increases food intake and decreases spontaneous locomotor activity in rats[2].
