

Product Data Sheet

Product Name: Letrozole-d4

Cat. No.: GC47554

Chemical Properties

Cas. No. 1133712-96-5

SMILES [2H]C(C([2H])=C(C#N)C([2H])=C1[2H])=C1C(N2C=NC=N2)C3=CC=C(C#N)C=C3

Formula C17H7D4N5 M.Wt 289.3

Solubility DMF: 16 mg/ml, DMF:PBS (pH 7.2) Storage Store at -20°C
(1:9): 0.1 mg/ml, DMSO: 16 mg/ml

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution: ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

Letrozole-d₄ is intended for use as an internal standard for the quantification of letrozole by GC- or LC-MS. Letrozole is a potent, cell-permeable inhibitor of aromatase (IC₅₀ = 2 nM).¹ It inhibits proliferation of estrogen receptor-positive (ER⁺) MCF-7 cells when used alone at concentrations ranging from 0.1 to 100 nM and when used at a concentration of 10 nM in combination with testosterone or 4-androstene-3,17-dione.² It also reduces matrix metalloproteinase-2 (MMP-2) and MMP-9 levels in MCF-7 cells when used at a concentration of 10 nM. Letrozole (10 µg per day) reduces tumor growth in an MCF-7Ca ovariectomized-mouse xenograft model.³ Formulations
