

## Product Data Sheet

Product Name: Influenza A virus fragment

Cat. No.: GP10128

### Chemical Properties

Cas. No.

SMILES CC(CC(C(NC(CCCCN)C(NC(CC1=CC=CC=C1)C(NC(C)C(NC(CC2=CC=CC=C2)C(NC(CO)C(NC(CCSC)C(NC(CCSC)C(O)=O)=O)=O)=O)=O)=O)=O)=O)N)C

Formula  $C_{46}H_{71}N_9O_{10}S_2$  M.Wt 974.24

Solubility  $\geq 88.7\text{mg/mL}$  in DMSO Storage Store at  $-20^\circ\text{C}$

General tips For obtaining a higher solubility, please warm the tube at  $37^\circ\text{C}$  and shake it in the ultrasonic bath for a while. Stock solution can be stored below  $-20^\circ\text{C}$  for several months.

Shipping Condition Evaluation sample solution: ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

### Background

Influenza A virus fragment has the RNA sequence of Leu-Lys-Phe-Ala-Phe-Ser-Met-Met. Influenzavirus A is a genus of the Orthomyxoviridae family of viruses. Some isolates of influenza A virus cause severe disease both in domestic poultry and, rarely, in humans. Influenza A viruses are negative-sense, single-stranded, segmented RNA viruses. The several subtypes are labeled according to an H number (for the type of hemagglutinin) and an N number (for the type of neuraminidase).

**Caution: Product has not been fully validated for medical applications. For research use only.**

Address: 10292 Central Ave. #205, Montclair, CA, USA

## Product Data Sheet

---

The Influenza A virus genome is contained on eight single (non-paired) RNA strands that code for eleven proteins (HA, NA, NP, M1, M2, NS1, NEP, PA, PB1, PB1-F2, PB2).
