

Product Data Sheet

Product Name: Triacetoneamine-d17

Cat. No.: GC71901

Chemical Properties

Cas. No. 52168-48-6

Formula $C_9D_{17}NO$ M.Wt 172.34

Solubility DMSO : 100 mg/mL (580.25 mM; Need ultrasonic and warming;
Hygroscopic DMSO has a significant impact on the solubility of product, please use newly opened
DMSO) Ethanol : 50 mg/mL (290.12 mM; Need ultrasonic and warming)

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

Caution: Product has not been fully validated for medical applications. For research use only.

Address: 10292 Central Ave. #205, Montclair, CA, USA

Product Data Sheet

Triacetoneamine-d17 (2,2,6,6-Tetramethyl-4-piperidone-d17) is the deuterium labeled Triacetoneamine. Triacetoneamine has oral activity and can induce acute liver failure (ALF) in rats.

Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs^[1].
