

Product Data Sheet

Product Name: DD1
Cat. No.: GC72910

Chemical Properties

Cas. No. 187585-11-1

Formula $C_{16}H_{14}N_2O_3$ M.Wt 282.29

Solubility DMSO : 100 mg/mL (354.25 mM; Need ultrasonic) Storage -20°C

General tips For obtaining a higher solubility , please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT , or blue ice upon request.

Structure

Background

DD1, a proteasome inhibitor, targets Bax activation and P70S6K degradation during acute myeloid

Caution: Product has not been fully validated for medical applications. For research use only.

Tel: (909) 407-4943 Fax: (626) 353-8530 E-mail: tech@glpbio.com

Address: 10292 Central Ave. #205, Montclair, CA, USA

Product Data Sheet

leukemia (AML) apoptosis. DD1 induces apoptosis in the caspase-dependent manner. DD1 induces mitochondrial membrane depolarization and Bad dephosphorylation.

DD1 (20 μ M; 96 h) shows antiproliferation activity in a dose- and time-dependent manner in U937 cells[1]. DD1 induces cell cycle arrest at G2/M phase and apoptosis[1]. DD1 (10, 20 μ M; 48 h) induces mitochondrial membrane depolarization, Bax upregulation and Bad dephosphorylation[1]. DD1 (2-20 μ M; 40 h) shows inhibitor for cmotrypsin-like activity in U937 lysates[1].
