Structure

Background

Nimbin is a limonoid that has been found in neem seeds and has diverse biological activities.^{1,2,3} It inhibits the growth of the plant pathogenic fungus *D. oryzae* by 64.8% when used at a concentration of 1,000 ppm.¹ Nimbin (0.02-2,000 µM) has antifeedant activity against *S. littoralis* in a choice test.² It decreases melanin content to 20.9% of control, without affecting viability, in B16 murine melanoma cells when used at a concentration of 25 µg/ml.³ Nimbin inhibits activation of Epstein-Barr virus early antigen (EBV-EA) induced by phorbol 12-myristate 13-acetate in Raji cells (IC₅₀ = 499 mol ratio/32
