

Product Data Sheet

Product Name: Kisspeptin 13 TFA

Cat. No.: GC74362

Chemical Properties

Cas. No.

Formula $C_{78}H_{107}N_{21}O_{18}.xC_2HF_3O_2$ M.Wt 1626.81 (free base)

Solubility H_2O : 25 mg/mL (Need ultrasonic) Storage Sealed storage, away from moisture

General tips For obtaining a higher solubility , please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT , or blue ice upon request.

Structure

LPNYNWNSFGLRF-NH₂ (TFA salt)

Background

Kisspeptin 13 TFA is the TFA salt form of Kisspeptin 13 . Kisspeptin-13 TFA inhibits glucose-induced insulin secretion with an IC₅₀ of 1.2 nM. Kisspeptin 13 TFA activates the pothalamic-pituitary-adrenal

Caution: Product has not been fully validated for medical applications. For research use only.

Address: 10292 Central Ave. #205, Montclair, CA, USA

Product Data Sheet

(HPA) axis, causes perthermia, motor behavior and anxiety in rats. Kisspeptin 13 TFA interacts with α 2-adrenergic and 5-HT₂ serotonin receptors, exhibits antidepressant efficacy. Kisspeptin 13 TFA is an activator for GPR54 and GnRH receptor, which enhances memory and can be used in Alzheimer's disease research.
