Product Data Sheet

Structure

Background

Sodium butyrate -d 3 (Butanoic acid-d 3 sodium) is the deuterium labeled Sodium butyrate. Sodium Butyrate (sodium butanoate) is an inhibitor of HDAC, possessing anti-tumor activity [1] [2] [3] [4] [5].

In Vitro, Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs.
