

Product Data Sheet

Product Name: Janelia Fluor® 585

Cat. No.: GC80344

Chemical Properties

Cas. No. 1811539-86-2

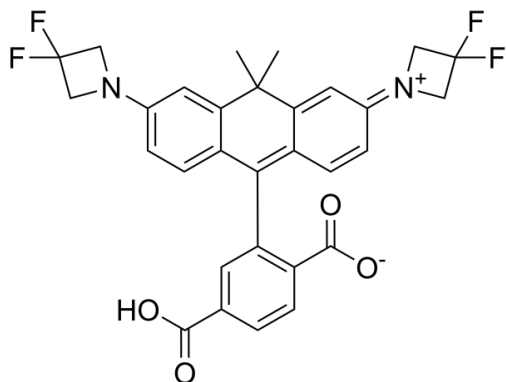

Formula $C_{30}H_{24}F_4N_2O_4$ M.Wt 552.52

Solubility DMSO: 100 mg/mL (180.99 mM; Need ultrasonic) Storage Store at 4°C, away from moisture and light

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

Janelia Fluor® 585 (JF585) is a fluorescent dye with high brightness, cell permeability, and blood-brain barrier permeability. Janelia Fluor® 585 can be used in combination with other Janelia Fluor dyes to support multicolor cell imaging experiments. Its excitation peak is at 585 nM and emission peak is at 609 nM [1].

Caution: Product has not been fully validated for medical applications. For research use only.

Tel: (909) 407-4943 Fax: (626) 353-8530 E-mail: tech@glpbio.com

Address: 10292 Central Ave. #205, Montclair, CA, USA

Product Data Sheet

In Vivo, Janelia Fluor® 585-HaloTag ligand (100 nM; intravenous injection, tail vein; intraperitoneal injection) exhibits blood-brain barrier permeability in mice, provides long-lasting neuronal labeling for up to 2 weeks, and does not significantly alter spontaneous neuronal activity^[1].

In Vitro, Janelia Fluor® 585 is a carbocyanine dye with orange spectral properties and high quantum yield, which shows a strong preference for the non-fluorescent lactone form in aqueous solutions^[1].
