

Product Data Sheet

Product Name: Didesmethyl cariprazine-d 8

Cat. No.: GC80835

Chemical Properties

Cas. No. 1308279-08-4

Formula $C_{19}H_{20}D_8Cl_2N_4O$

M.Wt 407.41

Solubility

Storage Store at -20°C

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

Didesmethyl cariprazine -d 8 is the deuterium labeled Didesmethyl cariprazine. Didesmethyl cariprazine is an orally active, BBB-permeable metabolite of Cariprazine. Didesmethyl cariprazine is a partial agonist at the D2 and D3 receptors, full agonist at the 5-HT1A receptor, and antagonist at the human 5-HT2B receptor (K_i: 1.41 nM (human D2L), 0.056 nM (human D3), 1.7 nM (human 5-HT1A), 0.52 nM (human 5-HT2B)). Didesmethyl cariprazine dose-dependently inhibits the spontaneous activity of rat midbrain dopaminergic neurons.

In Vitro, Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into

Caution: Product has not been fully validated for medical applications. For research use only.
