

Product Data Sheet

Product Name: Zocilurtatug

Cat. No.: GC81456

Chemical Properties

Cas. No. 3058592-86-9

Formula M.Wt 145.55

Solubility Storage Store at -20°C

General tips For obtaining a higher solubility , please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT , or blue ice upon request.

Structure

Zocilurtatug

Background

Zocilurtatug (ZL-1310 Antibody) is a human monoclonal antibody targeting DLL3. Zocilurtatug serves as the targeting antibody component of antibody-drug conjugates (ADCs) and is used in research related to small cell lung cancer and neuroendocrine carcinoma. Recommended isotype control: Human IgG1 kappa, Isotype Control [1] [2].

In Vitro, Antibody-drug conjugates (ADCs) are a novel class of anti-tumor drugs, consisting of three parts: a targeting antibody—which specifically recognizes tumor cell surface antigens and acts as a

Caution: Product has not been fully validated for medical applications. For research use only.

Product Data Sheet

"navigator"; a linker; and a cytotoxic payload. Zocilurtatug can serve as the targeting antibody component of an ADC, conjugated with a topoisomerase I inhibitor (camptothecin derivative) payload via a cleavable linker to form the complete ADC Zocilurtatug pelitecan. This allows for precise delivery of the cytotoxic payload to DLL3-positive tumor cells, killing tumor cells while minimizing damage to normal cells^{[1][2]}.
