

Product Data Sheet

Product Name: Murine ZP3 peptide (330-342)

Cat. No.: GC81373

Chemical Properties

Cas. No. 152439-29-7

Formula $C_{60}H_{93}N_{21}O_{21}$ M.Wt 1444.51

Solubility DMSO: 100 mg/mL (69.23 mM; Need Storage Sealed storage, away from moisture ultrasonic)

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

Murine ZP3 peptide (330-342) is a zona pellucida 3 polypeptide fragment with the amino acid sequence NSSSSQFQIHGPR. Murine ZP3 peptide (330-342) induces autoimmune premature

Caution: Product has not been fully validated for medical applications. For research use only.

Product Data Sheet

ovarian failure (POF). Murine ZP3 peptide (330-342) can be used for the research of premature ovarian failure [1].

In Vivo, Murine ZP3 peptide (330-342) (emulsified in complete Freund's adjuvant (CFA)) (50 nmol/L; s.c.; the second injection at an interval of 7 days (emulsified in incomplete Freund's adjuvant (IFA))) reliably induces premature ovarian failure in female Balb/c mice, as evidenced by disrupted serum hormone and cytokine profiles, altered ovarian and uterine morphology, reduced endometrial receptivity markers, and perturbed local immune cell populations[1].
