

Product Data Sheet

Product Name: Coenzyme Q10-d6

Cat. No.: GC47116

Chemical Properties

Cas. No. 110971-02-3

SMILES O=C(C(C/C=C(C)/CC/C=C(C)/CC/C=C(C)/CC/C=C(C)/CC/C=C(C)/CC/C=C(C)/CC/C=C(C)/CC/C=C(C)/CC/C=C(C)/CC/C=C(C)/C)=C1C)C(OC([2H])([2H])[2H])=C(OC([2H])([2H])[2H])C1=O

Formula C59H84D6O4

M.Wt 869.4

Solubility Acetonitrile: soluble, DMSO: soluble, Methanol: soluble, Water: soluble

Storage Store at -20°C

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request.

Structure

Background

Coenzyme Q₁₀-d₆ (CoQ₁₀-d₆) is intended for use as an internal standard for the quantification of CoQ₁₀ by GC- or LC-MS. CoQ₁₀ is a naturally occurring quinone found throughout the body in cell membranes, primarily in mitochondrial membranes, with highest concentrations in the heart, lungs, liver, kidneys, spleen, pancreas, and adrenal glands.¹ It is a component of the electron transport chain and participates in aerobic cellular respiration, generating energy in the form of ATP.² In its reduced form, CoQ₁₀ acts as an antioxidant, preventing the formation of reactive oxygen species.² CoQ₁₀ deficiencies have been associated with heart failure, hypertension, parkinsonism, mitochondrial encephalomyopathies, and other chronic diseases.^{3,4}

Caution: Product has not been fully validated for medical applications. For research use only.
