Structure

Background

Q₁-ALC-0315 is a cationic quaternary ammonium lipid derivative of the ionizable cationic lipid ALC-0315 that has been used in the generation of lipid nanoparticles (LNPs) for use *in vivo*.¹ LNPs containing Q₁-ALC-0315 and ALC-0315 as a cationic lipid pair (CLP) and encapsulating mRNA encoding a luciferase reporter induce luciferase expression in the lungs and spleen in mice.
