

Product Data Sheet

Product Name: egg white lysozyme (19-36) [Gallus gallus]

Cat. No.: GP10136

Chemical Properties

Cas. No.

Formula $C_{86}H_{144}N_{28}O_{23}S_2$ M.Wt 2002.37

Solubility $\geq 402.3\text{mg/mL}$ in DMSO Storage Store at -20°C

General tips For obtaining a higher solubility, please warm the tube at 37°C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request.

Structure

Background

Sequence: H₂N-KVFGRCELAAMKRHGLD-OH

Formula of Egg white lysozyme (19-36) [Gallus gallus]:

$C_{86}H_{144}N_{28}O_{23}S_2$

Hen egg white lysozyme has a molecular weight of about 14,600 and each molecule comprises 129 amino acid residues¹.

The crystals have unit cell dimensions $a = b = 79.1$, $c = 37.9$ Å and space group P4₃2₁2, and there are eight molecules in the unit cell, one per asymmetric unit². Liquid of crystallization constitutes about 33.5 per cent of the weight of the crystal³.

Caution: Product has not been fully validated for medical applications. For research use only.

Address: 10292 Central Ave. #205, Montclair, CA, USA

Product Data Sheet

The activity of lysozyme in promoting the dissolution of bacterial cell walls is now known to depend upon its ability to catalyze the hydrolysis of ,3-(1-4) glycosidic linkages between amino sugar residues in poly-saccharide components of these cell walls¹.
