

Product Data Sheet

Product Name: DCVC
Cat. No.: GC33934

Chemical Properties

Cas. No. 13419-46-0

SMILES N[C@H](C(O)=O)CS/C(Cl)=C\Cl

Formula C5H7Cl2NO2S M.Wt 216.09

Solubility DMSO : 23 mg/mL (106.44 mM); Water : 1.034 mg/mL (4.79 mM) Storage Store at -20°C

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

DCVC inhibits pathogen-stimulated TNF- α in human extra placental membranes in vitro. Target: TNF-

Caution: Product has not been fully validated for medical applications. For research use only.

Tel: (909) 407-4943 Fax: (626) 353-8530 E-mail: tech@glpbio.com

Address: 10292 Central Ave. #205, Montclair, CA, USA

Product Data Sheet

αin vitro: DCVC inhibits pathogen stimulated cytokine release from tissue punch cultures. DCVC (5-50 μM) significantly inhibits LTA-, LPS-, and GBS-stimulated cytokine release from tissue cultures as early as 4 h ($P \leq 0.05$). In contrast, TCA (up to 500 μM) does not inhibit LTA-stimulated cytokine release from tissue punches. DCVC effects on LTA-stimulated and LPS-stimulated TNF-α release from tissue punch cultures of extraplacental membranes. DCVC effects on GBS-stimulated release of pro-inflammatory cytokines from extraplacental membranes in transwell cultures.
