Structure

Background

Derivative of the von Hippel-Lindau (VHL) ligand, VH 032; commonly used as a precursor to a PROTAC® that hijacks VHL as the E3 ubiquitin ligase component. Supplied with a primary amine functional handle at a position known not to significantly affect binding to VHL, for ready conjugation to a linker/target protein ligand. PROTAC® is a registered trademark of Arvinas Operations, Inc., and is used under license. Require a different derivative• Get in touch
