Structure

Background

Loratadine-d₄ is intended for use as an internal standard for the quantification of loratadine by GC- or LC-MS. Loratadine is a non-sedating antihistamine that acts as a selective inverse agonist of peripheral histamine H₁ receptors ($K_i = 35$ nM).^{1,2,3} It has been shown to inhibit the release of leukotriene C₄ (IC₅₀ = 8 μM) and histamine (IC₅₀ = 11 μM) from rodent mast cells and to inhibit
