

Product Data Sheet

Product Name: Methomyl

Cat. No.: GC47648

Chemical Properties

Cas. No. 16752-77-5

SMILES C/C(SC)=N/OC(=O)N

Formula C₅H₁₀N₂O₂S

M.Wt 162.2

Solubility Chloroform: Slightly Soluble, Methanol: Slightly Soluble

Storage Store at -20°C

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request.

Structure

Background

Methomyl is a carbamate insecticide and molluscicide that inhibits acetylcholinesterase (AChE).^{1,2} It induces mortality of tobacco budworm larvae when applied at a concentration of 0.56 kg/hectare and southern armyworm larvae at a concentration of 0.01 and 100 ppm.³ Methomyl is toxic to the land snail *M. obstructa* (LD₅₀ = 11.9 µg/snail).² It is also toxic to rats *via* oral but not dermal administration (LD₅₀s = 30 and >2,000 mg/kg).¹ Formulations containing methomyl have been used in the control of insects in agriculture.
