

Product Data Sheet

Product Name: Zifaxaban

Cat. No.: GC70535

Chemical Properties

Cas. No. 1378266-98-8

Formula $C_{20}H_{16}ClN_3O_4S$ M.Wt 429.88

Solubility Storage

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution: ship with blue ice. All other available sizes: ship with RT, or blue ice upon request.

Structure

Background

Zifaxaban is an orally active, competitively and selective Factor Xa (FXa) inhibitor with an IC₅₀ of 11.1 nM for human FXa. Zifaxaban shows >10000-fold greater selectivity than other serine proteases. Zifaxaban can be used for the arterial and venous thrombosis research.

In venous thrombosis models in rats, Zifaxaban strongly suppresses thrombus formation with ED₅₀ values of 3.09 mg/kg, and its best efficacy time occurred at 2 h after administration^[1].

In arteriovenous-shunt thrombosis and carotid thrombosis models in rats, Zifaxaban inhibits thrombus formation in a dose-dependent manner^[1].

Caution: Product has not been fully validated for medical applications. For research use only.
