

## Product Data Sheet

Product Name: Cyclophosphamide-d4

Cat. No.: GC47148

### Chemical Properties

Cas. No. 173547-45-0

SMILES [H]N1P(OCC([2H])([2H])C1([2H])([2H])(N(CCCl)CCCl)=O

Formula C7H11Cl2D4N2O2P M.Wt 265.1

Solubility Chloroform: Slightly Soluble, Methanol: Slightly Soluble  
Storage Store at -20°C; protect from light

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution: ship with blue ice. All other available size: ship with RT, or blue ice upon request.

Structure

### Background

Cyclophosphamide-d<sub>4</sub> contains four deuterium atoms. It is intended for use as an internal standard for the quantification of cyclophosphamide by GC- or LC-MS. Cyclophosphamide is a nitrogen mustard alkylating agent used in the treatment of cancers and autoimmune disorders.<sup>1,2</sup> In cells with low levels of aldehyde dehydrogenase, cyclophosphamide acts as a prodrug and is metabolized to the active compound phosphoramidate mustard, which crosslinks with DNA and causes cell death.<sup>3,4</sup>
