

## Product Data Sheet

Product Name: Ischemin  
Cat. No.: GC79146

### Chemical Properties

Cas. No. 1357059-00-7

Formula  $C_{15}H_{17}N_3O_4S$  M.Wt 335.38

Solubility Storage Store at -20°C

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

### Background

Ischemin is a CBP bromodomain inhibitor that inhibits p53 interaction with CBP and transcriptional activity in cells. Ischemin inhibits p53 -induced p21 activation with an  $IC_{50}$  value of 5  $\mu$ M. Ischemin also prevents apoptosis in ischemic cardiomyocytes. Ischemin can be used in the study of cardiovascular diseases (such as myocardial ischemia) [1].

In Vitro, Ischemin (50, 100  $\mu$ M; 24 h) inhibits p53 activation on DNA damaging stress in U2OS cells[1]. Ischemin (10  $\mu$ M; 3 days) blocks apoptosis in cardiomyocytes by inhibiting caspase 3/7

**Caution: Product has not been fully validated for medical applications. For research use only.**
