

Product Data Sheet

Product Name: Asperglaucide

Cat. No.: GC46885

Chemical Properties

Cas. No. 56121-42-7

SMILES O=C(N[C@@H](C1=CC=CC=C1)C(N[C@@H](C2=CC=CC=C2)COC(C)=O)=O)C3=CC=CC=C3

Formula $C_{27}H_{28}N_2O_4$ M.Wt 444.5

Solubility DMSO: soluble, Ethanol: soluble Storage Store at -20°C, protect from light

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution: ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

Asperglaucide is an amide originally isolated from *P. aurantiacum* that has diverse biological activities, including anti-inflammatory, antibacterial, antioxidant, and anticancer properties.^{1,2,3,4} Asperglaucide inhibits production of nitric oxide (NO), prostaglandin E₂, and IL-1β in LPS-stimulated BV-2 microglial cells (IC₅₀s = 49.7, 51.5, and 40.4 μM, respectively).² It is active against Gram-negative bacteria (MICs = 0.05-0.10 mg/ml) and has antioxidant activity in 2,2-diphenyl-1-picrylhydrazyl and Trolox equivalent antioxidant capacity (TEAC) assays (EC₅₀s = 9.51-78.81 μg/ml).³ Asperglaucide decreases viability of U87 and U251 cancer cells *in vitro* when used at concentrations ranging from 10 to 100 μM and reduces tumor growth when administered at a dose of

Caution: Product has not been fully validated for medical applications. For research use only.
